

Structure de Contrôle

Conditionnement:

• Condition Simple:

```
if (expression) {  
    instructions;  
}  
else {  
    instruction;  
}
```

• Condition multiple:

```
switch (expr) {  
    case val1:  
        seq1;  
        break;  
    case val2:  
        seq2;  
        break;  
    [default]:  
        seqn;  
}
```

Iteration :

• while (tant que)

```
    initialiser  
    while (expression) {  
        instruction;  
    }
```

• for (pour)

```
    for (initialiser; expression; instruct) {  
        instruction;  
    }
```

• do ... while (faire ... tant que)

```
    do {  
        instructions;  
    }  
    while (expr);
```
